2019-2020

Name of the Department/Society: National Service Scheme

Name of the Event 19: Ozone Day Celebrations

Date of the Event: 16th September, 2019

"Through unprecedented pollution and reckless exploitation of natural resources, humans are digging their own graves by further depleting the ozone layer that acts as our very shield from the harmful UV rays of the sun." In this wake, a session on 'Ozone Depletion' was organised by N.S.S Hansraj in collaboration with Millennium India Education Foundation (MIEF) on September 16, 2019. The main objective of the seminar was the celebration of the 'World Ozone Day' and realization of the gravity of the ozone crisis in the contemporary world. The seminar was presided by Prof. Mayanglambam Ojit Kumar Singh', Assistant Professor, Department of Zoology, Ramjas College, who explained in detail the catastrophic effects of ozone depletion on the biodiversity of our planet. He further elaborated on the adverse effects of the depletion on farming, apiculture & the biotic as well as the abiotic components of our ecosystem. The seminar was further graced by the esteemed presence of our convenor, Dr. Monika Koul. Students showed up in large numbers. The room was vibrant with audiences both intrigued & engrossed into the deep insight offered by our honourable speaker, who not only helped us realize the crisis but also came up with innovative and feasible ideas to curb the same. Upon completion of the session, the winners of the poster making competition were declared. Eventually, the seminar reached its culmination and the audience dispersed with a gleam of enlightenment in their eyes. We, the N.S.S Hansraj family, were quite grateful and satiated upon the fruitful completion of the seminar and are further incentivized to organise many more.
