NAAC ACCREDITED 'A++' GRADE COLLEGE

2023-24

Title of the event: An International Seminar on Sustainable Environment and Climate Change
Name of the Society: Botanique, The Botanical Society of Hansraj College, in association with Institutional Innovation Council and Research Development Cell, Hansraj College
Venue: Old Seminar Room
Date: 15th June 2023 **Number of Participants = 90**

BOTANIQUE

Botanical Society, Hansraj College

In collaboration with Institutional Innovation Council
and Research Development Cell

Organizes an International Seminar
on
Sustainable Environment and Climate Change

Speakers

Prof. Ludovic F. Dumée
Department of Chemical Engineering,
Khalifa University, Abu Dhabi, United Arab
Emirates

Prof. Kailash C. Bansal
Secretary, National Academy of Agricultural
Sciences, India, and
Former Director, National Bureau of Plant
Genetic Resources

 15 June 2023  10:40 AM - 1:00 PM  Old Seminar Room

Prof. (Dr.) Vijay Rani Rajpal Teacher-in-charge Department of Botany Hansraj College		Prof. (Dr.) Rama Principal Hansraj College	

On the 15th of June, Botanique - The Botanical Society of Hansraj College, in collaboration with the Institutional Innovation Council (IIC) and Research Development Cell (RDC), organized an international seminar on 'Sustainable Environment and Climate Change', in Hansraj College, University of Delhi. The speakers of the event were A/Prof. Ludovic F. Dumeé (Department of Chemical Engineering, Khalifa University, Abu Dhabi, United Arab Emirates) and Prof. Kailash C. Bansal (Secretary, National Academy of Agricultural Sciences, India, and former Director of National Bureau of Plant Genetic Resources, IARI).

The event marked World Environment Day and Hansraj College's 75th anniversary, focusing on youth engagement, sustainability, and climate change awareness. It began with a lamp-lighting ceremony and momentos for dignitaries. Prof. Vijay Rani Rajpal highlighted the role of Botanique in promoting environmental research and technology. Dr. Dumeé discussed his research on extracting water from atmospheric humidity, differentiating it from cloud seeding and artificial rainfall. His technique utilizes humidity present globally at all times. Prof. Bansal explained genetic engineering methods like CRISPR-Cas, gene targeting, and the importance of developing drought- and flood-resistant crops. He addressed public perceptions and regulatory challenges of genetically-modified crops in India. A question-session covered drought-resistant varieties and other genetic modifications.
