PRINCIPAL &
PRESIDENT
IIC-HRC, DU**

The Department of Chemistry at Hansraj College, University of Delhi, in collaboration with the Institution's Innovation Council (IIC), organised an Innovation and Entrepreneurship Outreach Program For Community Service. The highlight of this program was a hands-on training session focusing on the production of herbal soap, colours, hand sanitizer and creams. With the increasing demand for natural and eco-friendly personal care products, this workshop aimed to equip participants with the knowledge and skills needed to create such products while promoting sustainability and environmental consciousness.

The workshop commenced with an introductory session outlining the importance of natural products in today's world and the benefits of using herbal alternatives. This was followed by interactive sessions led by undergraduate students of Department of Chemistry who demonstrated the step-by-step process of making herbal soap, colours, cream and hand sanitizer.

Through this initiative, the Department of Chemistry and the Institution's Innovation Council demonstrated their commitment to promoting innovation, entrepreneurship, and environmental consciousness. It is hoped that the knowledge and skills acquired during the workshop will empower participants to make informed choices for a healthier and more sustainable lifestyle, while also inspiring future endeavours in the field of herbal product manufacturing.
